

TOWN OF AVON CAPITAL IMPROVEMENT PROGRAM FISCAL YEAR 2015/2016

OVERVIEW

The Capital Improvement Projects Summary (pages R.9 through R.53) summarizes all projects that were requested by departments for funding in the first year, as well as the out years (two through five), of the Capital Improvement Program (CIP). Pages R.1 through R.8 highlight those projects that are being funded in the fiscal year 2015/2016 CIP. While the approved Capital Budget of \$3,531,172 is \$940,535 or 36.31% higher than the current year capital budget of \$2,590,637, \$820,000 is for projects funded by the Sewer Fund (Fund 5). Debt Service payments have decreased to \$3,300,940, a reduction of \$346,550 or -9.50% from the fiscal year 2014/2015 appropriation of \$3,647,490. Debt service is partially offset by \$250,000 through the use of accumulated bond and note sale premiums. Without this offset, Debt Service would have been \$3,550,938 or a reduction of \$96,552. In fiscal year 2015/2016, all \$3,300,940 in Debt Service is for existing General Fund Obligation Debt. For fiscal year 2015/2016, the approved Capital Budget (including sewer related projects) combined with Debt Service, totals \$6,832,112, an increase of \$593,985 or 9.52% from last year's combined total of \$6,238,127.

Completion of the Avon High School renovation project in 2008 capped approximately \$92.7 million in renovations and additions to Avon's school system since 1989 to accommodate increased enrollment, a changing programmatic curriculum, and additional federal and state mandates. The strength of the local economy and the desirability of living in a community with some of the highest standardized educational test scores in the State and one of the lowest tax rates of 29 Capitol Region towns have made Avon an excellent value for families with school age children. In recent years, Avon has grown rapidly, adding 1,400 school children to the Town's school enrollment since 1995, an increase of 63%. This growth has required the community to continue to evaluate and upgrade its school facilities. Recently, this process has focused on the predicted increase in the Avon High School enrollment. The community recommended a \$25,998,000 referendum in June 2005 and a supplemental \$4,700,000 at referendum in October 2006 to renovate and expand the Avon High School to absorb the increased enrollment. This was the second expansion to the High School within 10 years.

A more complete discussion of debt issuances can be found on pages M. 1 and M. 2.

APPROVED FISCAL YEAR 2015/2016 CAPITAL EXPENDITURES

Particular emphasis is placed on that portion of the five-year program that has been approved for fiscal year 2015/2016, the coming budget year. Historically, projects proposed for approval in the upcoming year have consisted of those items funded from revenues to be received during the year, either from taxes, outside resources, such as grants, or borrowing. These items generally have been budgeted in three (3) areas: Account #485, "Capital Improvement Projects;" Account #493, "Capital and Nonrecurring Expenditure Fund;" and in Capital Improvement "Summary," for those projects where borrowing authorizations are necessary, but no funding appropriation is required for the upcoming year. Account #485, "Capital Improvement Projects" is further divided into two (2) sub-accounts: Account #485.01, "Capital Improvement Projects, Facilities" and Account #485.03, "Capital Improvement Projects, Equipment." A more detailed analysis of the fiscal year 2015/2016 program is provided below. Sources for funding the program are outlined on R.6.

A. Account 485.01, Capital Improvement Projects, Facilities

This year's Capital Improvement Program for Town and BOE Facilities includes: \$396,772 for road surfacing and drainage improvements; \$170,400 for Sycamore Hills improvements and restoration; \$100,000 for the replacement of underground fuel storage tanks (yr 5/5) at the DPW garage; \$75,000 for infrastructure security improvements; \$75,000 town wide phone system upgrade; \$70,000 for Secret Lake Road improvements; \$27,000 for Buckingham Park baseball field batting cage and covered dugouts; \$429,000 for AMS science labs; \$190,000 for RBS HVAC units; \$140,000 for AHS flooring replacement; \$85,000 for PGS flooring replacement; \$50,000 to repair the entrance at AHS; and \$50,000 to upgrade voicemail to fiber optics. In past years, the Town has budgeted significant portions of its annual Road Improvement Program in this account. The work undertaken was essentially of two kinds: overlay of previously overlaid streets (maintenance), or extensive reworking of the surface to include base and sub-base rebuilding, drainage and curbing, as well as a final overlay (reconstruction/rehabilitation). Also included, but to be paid out of the Fund 05 Sewer Operation and Maintenance Fund as follows: \$500,000 is to extend sewer laterals in conjunction with road improvements; \$100,000 is for the rehabilitation of infrastructure where leaks are found by the Infiltration and Inflow Study and \$220,000 is included for survey, and design and a portion of the construction funds for the Farmington Interceptor Replacement Project.

B. Account 485.03, Capital Improvement Projects, Equipment

This year's Capital Improvement Program for Town and BOE Equipment includes: \$853,000, comprised of: additional funding to replace Avon Volunteer Fire Department apparatus (\$493,000); funding to replace a 1994 dump truck (\$200,000) in the Department of Public Works, Highway Division; funding to replace a 1992 Bobcat skid steer with trailer (\$100,000) in the Department of Public Works, Buildings & Grounds Division; and Police Department radio system consultant services and potential equipment purchase of (\$60,000).

C. Account 493, Capital and Nonrecurring Expenditures

This year's Capital Improvement Program does not include any funding in CNREF.

D. Anticipated Borrowing in Fiscal Year 2015/2016

Long-term borrowing in the amount of \$7.1 million was undertaken in fiscal year 2012/2013 to finance the Avon Free Public Library renovations and additions project, which was authorized in October 2009 and completed in April 2012. Both Moody's and Standard & Poor's recognized Avon's solid financial condition by upgrading the Town's bond rating in June 1998 from Aa1 to Aaa/AAA, the first Connecticut community to receive an upgrade by Moody's Investors Service to Aaa since 1979. The Aaa/AAA rating was reconfirmed in 2002, 2005, 2008, 2009 and, most recently, in October 2012.

In response to concerns expressed by the Avon Board of Finance, Town Council, and Board of Education, a successful effort was made between 1984 and 1988 to reduce borrowing by the Town for Capital Projects in an attempt to reduce per capita debt. The decrease in debt service freed funds, which permitted the Town to purchase equipment and renovate facilities on a cash basis and, beginning in 1988, allowed the Town to undertake a Master Schools Facilities Plan to accommodate school enrollment increases, programmatic changes affecting curriculum, and a growing list of state and federal mandates.

This resulted in significant additional long-term borrowing to fund school expansions and renovations, which continue to impact Debt Service Expenditures. Nevertheless, the Town's debt service peaked in fiscal year 2010/2011 and slowly started to decline in fiscal year 2011/2012; including fiscal year 2012/2013 borrowing for the Avon Free Public Library, debt service declined by \$687,548 in fiscal year 2013/2014, \$211,300 in fiscal year 2014/2015 and an additional \$346,550 in fiscal year 2015/2016.

Major additions, expansions, renovations, and new construction to various schools, totaling \$92,664,414, were undertaken in Avon from 1989 through 2005, in accordance with the Town's Master Schools Facilities Plan to accommodate growth in enrollment. Twenty five percent of these total project costs were partially paid for by grants from the State of Connecticut; the remaining balance of the school facilities program was paid for by the Town of Avon, and added significantly to the Town's debt.

In October 2009, long term debt was issued for the Avon High School renovation. Currently, there are no school projects included in projected net debt service for the Town through fiscal year 2029.

E. Impact of Capital Budget on Operating Expenditures

One byproduct of the sustained increase in capital spending for school facilities was significantly increased annual operating costs, particularly for utilities, custodial and cleaning costs. The addition of over 85,000 square feet of new school space in fiscal year 1991/1992, with the opening of the new Pine Grove Elementary School, the completed 27,000 square foot expansion of the Avon Middle School in fiscal year 1992/1993, the 29,000 square foot expansion of the Roaring Brook School completed in September 1994, the 63,000 square foot expansion of the Avon High School completed in 1998, the construction of the new 96,000 square foot Thompson Brook School in 2002, and the 67,500 square foot expansion of the Avon High School in April 2008, have resulted in additional Board of Education operational expenditures of at least \$5,000,000 per year for staff, maintenance, and operating costs.

Other improvements, particularly road maintenance costs, will afford some stabilization or perhaps slight reduction in per-unit cost for Town activities. Road improvements are expected to result in reduced maintenance requirements, faster snow-plow route turn-around time, less lost time due to increased trafficability, and a reduction in liability claims due to deteriorated surface conditions (potholes).

Expansion of the Library (from 18,000 square foot to 40,000 square foot) resulted in both increases and decreases to operating costs. Although the true, net operating cost impact will not be clear until the new building has been occupied for some time, some specific operating cost increases resulting from the project were built into the fiscal year 2012/2103 budget, including electricity (+\$29,300), HVAC service (+\$8,500), janitorial service (+\$8,000), and water consumption (+\$4,000). Operating cost reductions will result from decreased Public Works call outs due to new equipment.

Future capital projects anticipated to impact operating expenses include a new fire station in the northwest section of Avon, the development of additional athletic fields, and the expansion of the Town Clerk's Vault. The table below depicts the anticipated impacts to operating costs that will result from these Capital Projects.

Estimated Increase in Operational Costs of Future Capital Projects

Revised 06/02

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Vault Expansion				Town Clerk/Tax Collector				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
On July 20, 2004 the Public Records Administrator visited the Town Clerk's Office and cited the Town of Avon for failing to meet the published guidelines in regards to vault size. Increasing the existing 400 square foot vault by 600 square feet would meet the required published guidelines for the Town's built out population of 20,000 by 2015. State grants will not cover any construction costs; however, grant money can be used to purchase equipment for the vault. The vault expansion went to referendum in 2009, but was defeated by voters. State vault guidelines and document retention have not changed. I am continuously contacted by the Public Records Administrator's Office on the status of the vault expansion.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Town Hall Building #1 Renovations				Town Manager				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
Complete renovation of Building 1 on the Town Hall Campus was recommended in the Town Hall Master Plan of 1988 and is proposed in fiscal years 2017 and 2018. Building 1 is the last of the campus buildings to be renovated in accordance with this study. Improvements would include energy efficiency measures (insulation, windows, doors) and updates to comply with the ADA law. In the interim, \$30,000 was included in the fiscal year 2013 CIP budget to renovate the former Probate Space into a Town Manager's Office Conference Room, create a more formal welcome area for residents, relocate the building's mail, copier, and postage space, update the carpeting, ceilings, and paint, and to make some minor modifications to the building's common areas.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Police Department Radio System				Avon Police Department				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
The Avon Police Department anticipates the need to replace components of the radio system while a town-wide radio system is researched and developed. The replacement of the Police Radio System has been discussed dating back to 1998, when talk of regionalization was debated and studied (and ultimately defeated in fiscal year 20008/2009). A town-wide system will improve Public Safety communications and consolidate the cost of multiple Town department systems. Once the Consultant Report is finalized through this request, a more detailed schedule will be done, including operating costs. The Consultant will advise and assist in planning and developing a town-wide radio system.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Expansion of Emergency Management Operations Center				Avon Police Department				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
The Avon Police Department Emergency Management Operations Center requires expansion to accommodate sustained emergency operations involving natural or man-made disaster, a major crime incident and/or public health catastrophe whereby multiple Town Department would be involved in any/all of these events (Police, Fire, Public Works, Town Manager and Public Health Operations). The EOC expansion was originally proposed in 2006.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Fire Apparatus Replacement Plan				Avon Volunteer Fire Department				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
The existing Fire Apparatus Replacement Plan is necessary to ensure that the Avon Volunteer Fire Department is able to keep up to date with the fire service safety and response requirements; due to the ongoing changes, upgrades, and fine tuning to NFPA Standard 1901. NFPA 1901 is the Standard for Automotive Fire Apparatus, which has changed significantly over the years, especially in the area of apparatus safety. All Fire Departments must consider the value (or risk) to firefighters of keeping fire apparatus older than 15 years in first-line service. It is recommended that all apparatus greater than 15 years old, which has been properly maintained and still in serviceable condition be placed in a reserve status. The current Fire Apparatus replacement plan will allow the department to achieve, over time, the required upgrades in accordance with NFPA 1912.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Northwest Fire Station				Avon Volunteer Fire Department				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
The Avon Volunteer Fire Department is requesting funding to produce an endorsed fire station declaration of need and comprehensive station design by a certified architect and engineer experienced in fire station planning and safety. The objective is to assess and justify the need for a new fire station and evaluate all the limitations in the existing fire stations that currently exist today. Deliverables will include a go/no go recommendation for new station construction and recommended renovations (items needing immediate repair are a separate CBF-2 request) for the existing fire stations; inclusive of location and property cost, construction costs and a timeline for new construction and renovations to the existing stations.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Fire Station Facility Improvements				Avon Volunteer Fire Department				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
Due to the age of the four existing fire station facilities, the Avon Volunteer Fire Department is requesting funds to begin repairs and/or replacement of specific items related to building structure at each station; in addition to aged and/or non-functioning facility equipment (please reference CBF-3). Replacement of the requested items will reduce short and long term replacement costs, while ensuring the four fire stations are not only functional, but safe for fire department personnel and members of our community.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Water Supply Installation and Upgrades				Avon Volunteer Fire Department				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
The Avon Volunteer Fire Department has been working over a number of years to improve water supplies for firefighting/life safety to specific areas of town that lack municipal water systems. This program needs to be funded before it can continue. There is a significant risk to the residents in the Town of Avon and emergency services personnel, should a catastrophe take place in the noted areas that lack or have reduced water supplies.								
<ul style="list-style-type: none"> • Deercliff Cistern (fiscal year 2015) – 30,000 gallons includes tank, installation, and legal fees. • Oak Bluff / Vermillion (fiscal year 2016) – Use of pond or 15,000 gallon cistern and legal work. • Stony Corner Cistern (fiscal year 2017) – 3000 gallon includes tank, installation, and legal fees.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Self-Contained Breathing Apparatus (SCBA)				Avon Volunteer Fire Department				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
The Avon Volunteer Fire Department purchased all new respiratory protection in 2005. All composite SCBA cylinders have a maximum service life of 15 years, provided they are hydrostatically re-tested on a regular basis in accordance with DOT regulations. At the end of the 15 year service life, composite cylinders must be removed from service and destroyed to ensure that they cannot be used again. The fire department is required to replace 57 air packs and 183 cylinders. The current cost to replace this equipment is \$1,095,000; \$365,000 per year over a three year period. \$365,000 to be added into the CIP fiscal year 2020/2021.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Replace 1990 GMC Ariel Truck				Public Works – Highway 3101				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
This truck will be 25 years old when is scheduled to be replaced. It is a vital piece of equipment for tree maintenance and storm related duties. The condition of the truck is starting to show rust in key areas of the unit. It also failed its annual boom inspection this year and was placed out of service for 30 days pending the repairs by an outside vendor. This put a stop to all of our tree related duties. Current mileage is 89,939. Repair costs in fiscal year 2013/2014 were \$6,633. Downtime in fiscal year 2013/2014 was 1526 hours.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Drainage and Road Improvements – Cider Brook Road and Chidsey Road				Engineering				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
Projects proposed are intended to provide drainage and roadway improvements to Town roads and facilities utilizing the Pavement Management System. The projects proposed are to be located outside the urban system and are intended to facilitate a future road renovation program. For fiscal year 2015/2016 we have proposed improvements to Cider Brook Road. For fiscal year 2018/2019 and 2019/2020, we have proposed improvements to the Chidsey Road drainage system consisting of design and ROW acquisition. The Chidsey project was initially requested fiscal year 2008/2009. Estimates for construction are preliminary.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Reconstruction of Old Farms/Thompson Road				Engineering				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
Currently the project involves development of a feasibility study to evaluate the road relocation option which will provide estimates for construction, permitting, etc. Concurrently the Town is going to develop a design and estimates to rebuild the road within its existing corridor. The difference is going to be used to determine the "contribution" to the project by Avon Old Farms School. After the public informational meeting, final plans, agreements, and bid documents will be prepared. Subject to partial State and Federal reimbursement based on actual costs and timing throughout budget year. Costs are subject to change, but are best estimates as of 10-11.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Town-Wide Aerial Mapping				Engineering				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
Provide town-wide planimetric and topographic mapping - used for resident FEMA LOMA requests, design of public works projects, accident reconstruction, etc. The most current town-wide data we have is from 1984 hard-copy maps. To be shared with several departments and interest has been expressed to cost share by utility companies (Avon Water, CT Water). Would likely generate revenue as we sell the data to developers and consultants. This project was initially requested fiscal year 2010/2011.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Farmington Interceptor Replacement				Sewers				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
The Interceptor sewer within Farmington constructed in the late 1960's which flows the majority of the Farmington-treated Avon effluent is undersized and frequently surcharges. Per the inter-municipal agreement, Avon is responsible for this interceptor which is approximately 2500 ft. long. It needs to be replaced with larger pipe to accommodate current wet-weather and future general flows. Request for this fiscal year is for initial funds to survey and design the sewer as well as to encumber a portion of the construction funds. Originally requested in fiscal year 2014/2015.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Replacement of Old Farms Bridge over Farmington River including Old Farms Road from Tillotson to Rt. 10				Engineering				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
Replace existing Old Farms Bridge with 30' wide structure elevated to reduce the steep grade with Rt. 10. Includes reconstruction of approximately 1500' of Rt. 10 with additional turning lane. Construction of the projects would be funded 100% under State of CT Programs. ConnDOT has assumed final design for the roadway sections. Final bridge design to be paid by the TOA and is 100% reimbursable. ConnDOT will compile final design, secure permits, and manage all aspects of the construction - currently anticipated to be bid spring 2016.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Old Wheeler Lane Bridge Over Roaring Brook				Engineering				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
The Connecticut Department of Transportation performed a tri-annual inspection of this bridge in Spring of 2010 and have rated it POOR citing several structural deficiencies. In fiscal year 2011/2012 we were approved to hire a consultant to evaluate the bridge further, and to design its rehabilitation - while working with ConnDOT to secure Federal Local Bridge funding. In fiscal year 2011/2012 we were approved under the Federal Local Bridge program (80% fed, 20% local). In fiscal year 2013/2014 we selected a consultant who is working on evaluations, alternatives and estimates - we anticipate providing recommendations to Administration Spring 2015.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Field Development – Fisher Meadows				Recreation and Parks				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
The purchase of the Fisher Farm allowed for the development of the fields to the north of the present playing fields at the Fisher Meadows Recreation Area. These fields were part of the Master Plan in 2008; and have been discussed as a vision for the parcel since 1990. Funding in fiscal year 2008/2009 from the Fisher Meadows Fund in the amount of \$20,000 provided the final schematic design to provide initial costs of the finished product and soil testing. The permitting process (\$80,200), using funds from the Fisher Meadows Fund, has now been completed. It should be noted that the costs are estimated to increase 5% each year from the estimates seen below – updated from previous estimates at the end of the permitting process.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Spring Lake/Willow Pond Connection – Fisher Meadows				Recreation and Parks				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
During the original construction of the fields in 1980-1981, a pipeline connecting the two ponds was crushed or partially removed. This project would restore that connection and thus provide an additional supply of water to Spring Lake from Willow Pond, supplied by Thompson Brook. The estimate was provided by the Town's Engineering Department and assumes that much of the design, trenching, and pipe-laying will be done by Town staff. It is paired with the Fisher Meadows Field Development, as that may provide some saving.

I. PROJECT:				II. AGENCY OR DEPARTMENT:				
Board of Education Administrative Offices Renovations Project cost estimate (2001)				Avon Board of Education				
III. PROJECT BACKGROUND, PURPOSE AND OBJECTIVES:								
Towpath Annex Renovation project (total estimated cost \$1,875,000): This cost excludes architectural analysis. Architectural analysis (\$45,197). Safety upgrades (electrical, heating, ADA), replace exterior siding, ADA code requirement – stairways, underground storage tank removal, resurface parking lot, interior renovations: heating, air-conditioning, electrical insulation and fixtures, ADA code requirements, abatement and hazardous materials removal. The Board recommends alternative accommodations be explored to avoid the expense at this functionally obsolete facility.
